Introduction

General safety training enables employers to ensure a safe and healthy work environment and equips employees with the knowledge necessary to diagnose and reduce safety hazards. This ethos is extremely important when managing a safety workplace and we will talk about the impacts of poor safety culture in the workplace environment.

Aims & Objectives

- Understand the requirements for Health and Safety in your workplace
- Know what action to take when presented by a hazard
- Understand what risk assessments should be in place
- Understand what annual audits should be in place
- Be confident in challenging unsafe behavior
- Understand accident reporting processes and procedures
- Feel equipped to build a great safety culture within your team
- Understand the permit to work process and when this applies

Learning Outcomes

By the end of the session, candidates should be able to:

- Confidently take action when presented by a hazard within the workplace
- Be able to discuss safety matters with management and colleagues in a proactive and collaborative way
- Be able to review a risk assessment for clarity or to address a safety concern
- Confidently challenge hazardous behavior
- Know what action to take when works are due within the premises
- Understand the legal duties to colleagues and members of the public.
