Our acceptance of your booking brings into existence a legally binding contract between us. To avoid any confusion, we ask that cancellations are by email only. Payment is required in advance of the course. Refunds can only be requested 2 weeks prior to the course date. No refunds will be issued within two weeks of the course date.

Introduction

This interactive workshop explores all aspects of COSHH management, focusing on your legal and moral duties in the workplace. You will discover how effective control and assessment of hazardous substances not only fulfil statutory obligations but also dramatically reduce the risk of workplace injuries and ill health. Our training combines real-life scenarios, clear explanations, and participatory activities, ensuring every delegate leaves confident and empowered.

Aims & Objectives

- Gain a clear and thorough understanding of COSHH regulations, including the duties of employers and employees
- Learn to identify substances that may cause harm and categorise different types of hazardous materials found in various workplaces
- Develop practical skills in conducting and documenting COSHH risk assessments, involving teams and creating a culture of safety
- Recognise the variety of health risks posed by hazardous substances, from acute effects such as burns and poisoning to chronic conditions including dermatitis and respiratory illnesses
- Understand the importance of safe storage, correct handling techniques, and emergency response procedures
- Interpret hazard labels and Safety Data Sheets so you can make informed decisions about control measures
- Apply strategies for risk reduction and personal protection, including the correct use of PPE and engineering controls

Learning Outcomes

By the end of this course, participants will be able to:

- Recognise a wide range of hazardous substances and understand the specific dangers they present in your workplace
- Confidently assess risks by using COSHH assessment forms and interpreting Safety Data Sheets for both common and specialist chemicals
- Select appropriate substances and implement robust safety precautions tailored to specific tasks and environments
- Demonstrate how to complete COSHH assessments that comply with current legal standards and company policies
- Promote and maintain a safe environment by identifying situations where additional controls or personal protective equipment are required
- Respond effectively to accidental exposure or incidents involving hazardous substances, ensuring rapid, appropriate action is taken

Join us to develop your understanding, build your confidence, and become an advocate for safer, healthier workspaces. Investing in your COSHH training protects not only your legal standing but the well-being of everyone in your organisation.
